

COMMENT SET 12: LINDE OWEN, LOCAL RESIDENT

ATT00020

Dear State Lands Commission,

AT&T's installation of a fifth fiber optic connection is a low impact project because of prior planning yet the Montana de Oro State Park is in need of an infusion of a minimum of \$40,000 annual revenue in order to keep the park open to the public. Access to the currently provided parking area and boardwalk is affected.

This is an opportunity to ask AT&T to participate in keeping the park open to the public and because they gain profit by expanding their fiber optic connection due to their use of our public lands, I am asking for contribution to this local need (to keep the park open to the public). It is a global destination because of its unique beauty and breathtaking nature.

As a corporate sponsor, AT&T would spend a little to gain a lot. Please give back to Los Osos and the millions who visit this wild land park. Offer up a mitigation that keeps our entrance free. Get credit.

Due to the rusty cogs of government I ask that YOU offer this mitigation.

You receive a benefit, users of the park are about to lose a benefit. Can you help us? Isn't \$40,000/annually a pittance compared to your increased potential for profits?

One cannot guess the number of global AT&T clients that visit this incredible park. Please consider funding our Kiosk fee by working with our local State Parks and receive the additional credit for keeping our Montana de Oro State Park free. Good PR, cheap and big kudos locally.

Thankyou and Happy 2009,

Linde Owen
